Our cats are vaccinated with killed vaccines only, and have never received Chlamydia, FIP or Feline Leukemia vaccines. The administration of live or modified live vaccines of any type, and/or the administration of the Chlamydia, FIP, or Feline Leukemia vaccines at any time will immediately and permanently void all health guarantees. Initial kitten vaccinations are administered by our Veterinarian at 8 and 12 weeks of age. [*Vaccinating any earlier is not effective as kittens are still nursing*]

We advise one further booster vaccination at 16 weeks and a final booster at approximately one year and four months of age. Then there are no further vaccines for three years. Rabies, of course is a separate issue and the protocol has not been revised for this vaccine, however we do recommend a non-adjuvant rabies vaccine as it has been shown to have the lowest tissue reaction with a probable lower rate of vaccine induced sarcoma.

Feeding schedule and type of food currently being used:

Your kitten is currently eating raw chicken, can kitten (Performatin) as per in the booklet and a ¼ cup of Performatrin kibble.

If a kitten is sold as a breeder prospect, it will also come with a five generation pedigree, health guarantee, and the TICA registration application. The terms and conditions for these kittens or cats are clearly outlined within the contract and health guarantee.

It is important that potential owners understand the activity level and type of personality our Bengals possess. If you are looking for a lap cat, our Bengals are certainly great lap warmers, but they also require a lot of exercise and interaction with their humans. Like all kittens, they are very curious, and feel the need to explore everything in their environment. An older kitten or young adult could be considered if one is looking for a less active Bengal. Since they are out of the boisterous kitten stage, they can be great pets for someone who wants this breed of cat but would prefer not to go through the kitten stage.

Kitten Evaluation and Sales Information

We continually strive to produce only the best quality in our Bengals and are pleased to offer carefully bred kittens to our discerning buyers. All of our Bengals are fully guaranteed and come complete with a sales contract and health guarantee, current vaccinations, Vet check-up, spay/neuter, and a five generation pedigree of the parents.

PAPARAZZI BENGALS HEALTH GUARANTEE:

Currently, our cattery has been screened, and we continue to test all incoming cats for Feline Leukemia [FeLV], Feline Immunodeficiency Virus [FIV], and Tritrichomonas [TF] and PCR test. We also screen all breeding age cats **annually** for Hypertrophic Cardiomyopathy [HCM] and any other heart problems, as well as Polycystic Kidney Disease [PKD]. While we do realize that a cat may test negative for HCM today and still come up positive on the next annual scan, we will continue to use the means we have available now, while we wait for the genetic markers to be found. This Bengal cat or kitten is guaranteed to be of sound health and temperament upon arrival, and is guaranteed for a period of 72 hours from time of purchase, (arrival) if Vet-checked within that time.

It is recommended that the new cat/kitten be in quarantine during this time, and if the Bengal is found to be medically deficient with an untreatable or life-threatening problem within the 72 hour guarantee period, it must be reported to Paparazzi Bengals immediately. If no replacement is available at the time, Paparazzi Bengals will have 6 – 12 months to furnish a satisfactory replacement. All shipping costs are the buyer's responsibility.

No cash refunds. The cat/kitten cannot be returned after the guarantee period has expired and/or if it has been exposed to another cat which has not been currently tested for FeLV and FIP. There are no guarantees against FIP. It is the responsibility of the buyer to provide immediate veterinary care to any cat/kitten showing signs of illness or distress and failure to do so will render any guarantee null and void. If a cat/kitten dies within the guarantee period, despite medical treatment, a replacement will **ONLY** be given if a veterinarian certifies the cause of death.
